

Colors of various
pokemon types

Font:
Bauer Bodoni

You can customize UI color of your
pokedex to the color associated
with your fave type of pokemon:
fire, electric, psychic. etc

Pokedex color is currently set to
Dragon Type

I don't know if possible, but might be
cool to make animation of pokedex
flipping open???

I know you can CSS rotate in 3D space

I want the pokedex to appear this
way in all screen sizes, simply
scaled to the device, but no UI
changes.

Will try to code the D Pad to use
WASD keys or Arrows.
